ECOtankas are beautiful solid 304 stainless steel high food grade drink bottles

ECOtankas look modern and very attractive, while at the same time offering one of the most hygienic surfaces available. Stainless steel is very easy to clean and its unique surface has no pores or cracks to harbour dirt, grime or bacteria. So your bottle stays completely clean and safe for years upon years.

ECOtankas are ultra light and durable, they are not lined with any material and they do not break down or leach in any way. They are completely safe and non-toxic. A one year warranty is also offered against faulty manufacturing.

Fluids can be changed from a juice or sports drink back to water, and there is no tainting or after taste. Drinks from an ECOtanka always taste beautifully clean and fresh, and the stainless steel holds them cooler for longer periods of time.

ECOtankas come in a range of sizes, from the toddler size 350ml bottle through to the Supa tanka which holds 1.2 litres. Polypropylene non-leaching plastic sports caps are available for the bottles, along with loop caps that have a stainless steel inner and adaptors for kiddie sipper tops. All of the caps are interchangeable with any bottle and extra caps are available if required at any time.

ECOtankas are very easy to care for. Simply wash in warm dishwashing water and then rinse clean. Because the surface is stainless steel it is super hygienic. Bottles can also be sterilized with boiling water if required.

The ECOtanka name and branding is designed to help encourage you to fill and take your own bottle and to re-use it over and over again.

Each year we are drinking 30 billion throw-away bottles of water worldwide! That is 2.7 million tons of plastic. If you put the bottles end to end, they would go around the world more than 150 times... and that is every single year!

In the US on average one person uses 166 disposable plastic water bottles a year, and 8 out of 10 of these bottles become garbage or end up in landfill. The buried bottles can take up to 1000 years to biodegrade.

Please do your part to help keep our world green, healthy, clean and beautiful for your children and their generations to come. Take a tanka!

Stainless steel has a life expectancy of over 100 years, and is 100% recyclable.

The ecologically friendly stainless steel alternative to plastic!

teeny TANKA™ 350ml

Teeny tankas are designed for kiddies, or for adults who want a bottle which will fit into a small bag or handbag. They hold a volume of 350mls (one large glass) and are ultra light and compact, measuring approximately 125mm from the bottom to the top of the stainless steel area.

As pictured above, these bottles are available with either a sports cap or a stainless steel loop cap. Twin packs of Avent "Easy-Sip" spouts are also available with an adaptor to fit them to the bottle. These are designed especially for toddlers.

sports TANKA™ 800ml

Sports tankas are the most popular of the ECOtanka range. They hold a volume of 800mls (three regular sized glasses), are ultra light and measure approximately 230mm from the bottom to the top of the stainless steel area.

As pictured above, these bottles are available with either a sports cap or a stainless steel loop cap.

mini TANKA™ 600ml

Mini tankas are slightly smaller than the average sports size bottle. They hold a volume of 600mls (two large glasses), are ultra light and compact, measuring approximately 180mm from the bottom to the top of the stainless steel area.

As pictured above, these bottles are available with either a sports cap or a stainless steel cap. They also fit the adaptor and Avent toddler "Easy-Sip" spout.

supa TANKA™ 1.2 Litre

Supa tankas are special extra large drink bottles. They hold a volume of 1.2 litres (four large glasses), are ultra light and measure approximately 230mm from the bottom to the top of the stainless steel area.

As pictured above, these bottles are available with either a sports cap or a stainless steel loop cap.

Additional lids are available as optional separates. Lids fit to all bottles and are fully interchangeable.
